PotomacEdison®
A FirstEnergy Company

EmPOWER MARYLAND

Instant Lighting Discounts

Lower your lighting costs with instant savings on high-efficiency LEDs.

When your business is ready to switch to energy-efficient LED lighting, Potomac Edison Instant Lighting Discounts will ensure you receive the lower price right away. Shop with a participating distributor and your savings will be included at the point of purchase. No paperwork, no wait.

Shop. Select. Save.

Instant Lighting Discounts are available for all Potomac Edison Maryland commercial and industrial customers and Program Allies. Simply look through our eligible products list, then shop and save.

1. Shop with a participating distributor.
2. Select or ask for a qualified lighting product.
3. Save when you purchase, knowing your discount is included.

Qualified project types include linear LED and LED lamp technologies replacing linear fluorescent, incandescent, high-intensity discharge or other inefficient lighting. All products must be installed within 90 days following the purchase.

What to Have Ready

To receive your Instant Discount, you'll need to provide the following information:

- Potomac Edison account number
- Installation business name and address
- Contact name and phone number

That's it! Your savings will be applied at the point of purchase, and your business will be using less energy year after year.

Benefits to Your Business

Instant Discounts on LED lighting at point of purchase

No paperwork, no wait

Lower energy costs and less maintenance

Bigger Discounts on LED Lighting

EmPOWER Maryland programs are funded by a charge on your electric bill. EmPOWER programs can help you reduce your electricity consumption and save you money. Go to **energysaveMD.com** to learn more about EmPOWER and how you can participate.

By participating in energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights, which refers to the demand reduction associated with any energy efficiency or peak demand reduction measures for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.
